

Kurilpa Futures Proposed Plan Preparation Arrangements for New West End Peninsula Plan

1. The plan should be prepared by the City Council with involvement of residents and users of the area, including neighboring users such as South Bank Corporation (SBC), the State Government and other major cultural and arts providers. This should include the holding of at least three well publicised and resourced open planning workshops to set collaborative objectives, identify and evaluate desirable options and review proposals before Council adoption and State Government approval.
2. It is recommended that the responsibilities of the South Bank Corporation be extended to include the administration of the Kurilpa Peninsula (the 26 hectare area covered by the unapproved draft Kurilpa Master Plan) the planning of which should now be integrated with the preparation of the Peninsula Plan, in which the SBC will participate.
